Dear Mr. Curry,

From the official non-conspiracy theorists to the multitude of those who theorize there was a cpnspiracy that killed JFK, the common factor is that they all disregard or misrepresent the probative official evidence.

There can be no responsible theorizing that does hot at the least conform with this official evidencd.

From what I know of that evidence I believe your informant is a would-be Perry Mason and hasn't the slightest notion of what that evidence is.

I also believe it eliminates the possibility of what he has told you, that the Freemasons did it.

Sincerely,

Harold Weisberg
